EDUCATION

Sri Eshwar College of Engineering	B.E. CSE	CGPA 7.7 (Upto 4th Sem)	2023-2027
NOTRE DAME OF HOLY CROSS (CBSE)	HSC	83%	2021-2023
NOTRE DAME OF HOLY CROSS (CBSE)	SSLC	91%	2020-2021

INTERNSHIPS

isaiiAi -Ai Backend Engineer	2025
------------------------------	------

Worked on the Agent4Trip project to build a backend service that summarizes multiple customer invoice PDFs using a custom PDF loader pipeline.Extracted structured data from invoices with Amazon Textract and generated summaries using Gemini LLM.Developed and deployed the solution using FastAPI. Project Link
Tech Stack: Python, FastAPI, AWS Textract, Gemini

CodeBoosters - ai agents

Built multi-agent systems with CrewAI, AutoGen, and LangChain, integrating RAG and tool-enabled actions over APIs and knowledge bases.
Improved task success via hierarchical/sequential workflows, retrieval tuning (chunking, top-k, hybrid search), and feedback-driven evaluation.
TechStack: Python,FastApi,Langchain,AutoGen,CrewAi

PROJECTS

AGENT PLOT	Github	2025
------------	------------------------	------

MultiAgentic Chart Generator uses LangGraph to turn user queries into accurate data visualizations.
It follows a Corrective RAG setup with Rewrite, Research (Tavily), and Chart (Python) agentsPowered by Gemini, Groq, and LangChain, the agents collaborate in a self-correcting loop for reliable results
Tech Stack: Langraph , langchain , Gemini-1.5-pro , Tavily api key ,Python

AUTOLANG	Github	2025
----------	------------------------	------

Agentic RAG with a self-validating multi-agent system with Rewriter, RAG, and Writer agents working in tandem for high-quality answer generation.It loads and chunks web data, embeds it using Gemini, retrieves context via ChromaDB, and responds using Groq model.
Tech Stack: Python,langraph, LangChain, ChromaDB, Gemini Embeddings, Groq LLaMA 3.1,WebBaseLoader

FINETUNING:FLAN-T5 Using QLORA	Github	2024
--------------------------------	------------------------	------

Fine-tuned the Flan-T5 model for English-to-German translation using the QLoRA technique, enabling efficient training on limited hardware via low-rank adaptation.Leveraged a high-quality bilingual dataset to improve contextual translation performance while preserving model nature.
Tech Stack: English-German dataset(huggingface), Transformers , Tensorflow , Python , QLORA Technique ,Python

CERTIFICATIONS

Datascience,Machine Learning,Deep learning , Nlp Bootmap-Krish Naik	Udemy - 2023
100 days Of Python – Angelina u	Udemy - 2024
Learn End to End LLM Generative AI projects - Langchain HuggingFace, LLAMA Gemini models Langchain 2023	Udemy - 2024
Agentic-Ai with Langraph ,Crewai ,MultimodelRag , agno and Aws cloud - Krish Naik	LiveClass

ACHIEVEMENTS

CyberHack - Ai and Cybersecurity Hackathon – 2 nd prize	2025
DatascienceHack -National level datascience hackathon – 2 nd prize	2025
Innovista- National level paper presentation competition -2 nd prize	2025
Leetcode- Max Rating:1454 Global Rank: 1,249,928	2025
Chess- 1st Place in U-19 State Chess Championship ,Tirunelveli	2023
Chess-10th Place in U-19 National Chess Championship, Maharashtra.	2023

SKILLS

Languages : Python | C
Frameworks :FastApi | Flask | LangChain | Autogen | LangGraph | Scikit-Learn |Pytorch | Streamlit |Gradio
Libraries : Pandas | Numpy | Matplotlib | Seaborn
