EDUCATION

B.E CSE - Sri Eshwar College of Engineering CGPA:8.02	2023-2027
HSC -Kongunadu Matric Hr Sec school 94.5%	2021-2023
SSLC -Kongunadu Matric Hr Sec school PASS	2020-2021

INTERNSHIP

Isaii Ai – Junior React Native Developer - View	2025
---	------

Worked as a Junior React Native Developer at Isaii Ai, contributing to the development of their AI-driven product

Tech stack: React Native, Node.js, Express, MongoDB, AWS, Kafka, Consul

RAMPeX Technologies- SDE Intern - View	2024
--	------

Contributed to multiple real-world projects across frontend and backend in an Agile environment. Worked on a microservices-based architecture and cloud-native services, gaining hands-on experience with distributed systems and scalability.

Tech stack: React.js, Node.js, Express, MongoDB, AWS, Docker, Eureka, Zipkin, Selenium, RabbitMQ, Redis, Cockatiel

PROJECTS

Jobsy : AI Resume Intelligence Engine	Code	2025
---------------------------------------	----------------------	------

Built an AI-powered system that performs ATS-style resume scoring, suggests resume improvements, and recommends best-fit jobs using semantic similarity. Implemented resume parsing, embedding generation with sentence-transformers, and vector similarity search using FAISS. Exposed REST APIs using FastAPI to support resume upload, scoring, and job matching.

Tech Stack: Python, FastAPI, LangChain, HuggingFace Transformers, FAISS

AlgoGit : AI-Powered GitHub-Integrated DSA Manager	Code	2025
--	----------------------	------

AlgoGit is a Chrome extension that automatically tracks DSA submissions, classifies solutions by concepts, organizes them in GitHub, and uses AI to generate explanations and commit messages to help users retain problem-solving logic over time.

Tech Stack: React, Chrome Extension API, Spring Boot, MongoDB, Groq LLaMA API, GitHub API

LumaAccess-Version-1	Code	2025
----------------------	----------------------	------

LumaAccess is a remote desktop access system enabling users to control their devices securely via a web interface.

Developed an Electron-based agent with WebSocket support for system commands like shutdown, restart, and lock. Desktop access and live screen sharing are fully functional, with upgrades planned for future releases.

Tech Stack: React.js, Node.js, Express, MongoDB, Prisma, WebSocket, Electron, Ollama, Llama2

FlexiLB : AI-Powered Load Balancer Operations Platform	Code	2025
--	----------------------	------

Developed FlexiLB, a web application for professional load balancer management, offering real-time monitoring, performance analytics, and intuitive server controls. Integrated an AI-powered chat assistant capable of creating, updating, and managing load balancers autonomously, streamlining operations and enhancing system reliability across multiple algorithms.

Tech Stack: React.js, Bun, Hono, MongoDB, RabbitMQ, OpenAI API

CERTIFICATIONS

React Certified Udemy	2024
---	------

Java Certified Udemy	2024
--	------

Agentic AI Bootcamp – LangChain & LangGraph - Krish Naik Udemy	2025
--	------

ACHIEVEMENTS

Winner of Kanam 2k'25 (24 hrs hackathon)	2025
--	------

Contributed 1,900+ times on GitHub within 10 months, showcasing commitment to development and open-source projects and other work	2025
---	------

Published 3 Npm packages to improve developer tooling and streamline workflows - View	2025
---	------

Authored a NuGet package to strengthen developer tooling and accelerate workflows - View	2025
--	------

CODING PROFILES

LeetCode : Solved 660+ problems | Max Rating : 1,642 | Global rank : 131,684 | [link](#)

Skill Rack : Solved 620+ problems | Received 1 certificate | 160 Bronzes | [link](#)

SKILLS

Languages & WebTech- JavaScript | Python | C | C++ | Java

AI & LLM Tools - LangChain | LangGraph

ML & Data - scikit-learn

Libraries & Frameworks-ReactJS | Node.js | Express | React Native | NextJS | Tailwind | Spring Boot | Bun | Hono

APIs, Messaging & Caching - REST API | GraphQL | gRPC | RabbitMQ

Hosting and Deployments - AWS (EC2, Load Balancer, Auto Scaling Group, Lambda, Amplify, Elastic Beanstalk, WAF, ECS) | Vercel | Render | Netlify | GitHub Actions (CI/CD) | Terraform

Tools - VSCode | Jupyter Notebook | GitHub | Git | Docker | Postman | IntelliJ IDEA | Figma

Database - MySQL | MongoDB

Core Concepts - DSA | DBMS | OOP | System Design | OS
